

Petfuel SI CW

Cold Weather Start Up Spark Aider

Description

Petfuel SI CW is a spark aider for cold weather start-ups in gasoline engines. This product is a high purity, stable organo-potassium in a high flash point dearomatized hydrocarbon solvent. It has been specifically developed for use within detergent additive packages, and can also be used as a single performance additive. This product displays excellent compatibility with other components and packages.

Application

- Use to improve engine ignition, particularly in colder conditions.
- In older engine types, this product enables the use of unleaded gasoline.
- Use in combination with a detergent additive to prevent valve recession and to keep injector and inlet valves clean.
- The recommended treat rate is 50-150ppm in the unleaded gasoline.

Typical Properties

Property	Typical	Min.	Max.
Appearance	Clear to slightly hazy liquid	-	-
Viscosity @40°C (cSt)	-	-	300
Density @20°C (g/cm ³)	-	0.98	1.01
Flash Point (PMCC, °C)	-	61	-
Water Content (%wt)	-	-	0.5
Potassium content (%w)	-	5.0	-

Storage and Handling

Observe good chemical handling and hygiene practices. Consult the SDS for more information.
