

Suretech[®] AF-10A

Antifoam for Aqueous Systems

Description

Suretech[®] AF-10A) is an economical blend of siloxanes and dispersing agents in water. This product will provide good foam knock-down performance at very low treat rates. Suretech[®] AF-10A can be used 'Neat', and is easily dispersed in aqueous systems.

Application

- Use an an anti-foam and defoamer.
- Specially formulated to enter the 'Neat' solution without interference to the chemical balance of the system.
- Due to the wide variety and complex nature of different foaming scenarios, we recommend a starting treat rate, for test purpose, of 500ppm

Typical Properties

Property	Typical
pH	8.0
Solubility in Water	Dispersible
Appearance	Pale Opaque Liquid

Storage and Handling

Suretech[®] AF-10A should be stored at ambient temperatures; do not expose to freezing conditions. It is recommended to stir the product thoroughly before use. This product is both non-toxic and non-flammable.
