

Suretech AF-PAG

PAG Based, silicone-free Antifoam

Description

Suretech AF-PAG is a 100% active antifoam, based on polyalkylene glycol technology. This product is silicone-free and self-emulsifying; it is compatible with a variety of substances (surfactants, resins, foamers) and stable across a range of pHs.

Application

- Recommended; treat rate 0.1 -0.3%. Premix with 5-6 parts of water.
- Add at any stage of production.
- Suitable for use in aqueous systems.

Typical Properties

Property	Typical	Method
Colour	Pale Yellow	Visual
pH	5	Internal
Density (g/cm ³)	0.96	Internal
Viscosity (mPas)	0.99	Internal
Active Content (%)	100	Internal

Storage and Handling

Store at 5-35°C. Do not allow the product to freeze. Store in the original, sealed packaging. Handle in accordance with good chemical hygiene and safety practices. Consult the SDS for further information.
